

VSP 3D Scanning Solutions

Artec3D

VSP Technologies has continuously sought innovative solutions to streamline measurement processes, enhance accuracy, and reduce plant downtime. The implementation of the Artec3D Leo scanner has significantly improved workflow efficiency, particularly in cases where traditional measurement methods prove challenging. Learn how adopting 3D scanning technology can transform your company's operations, unlocking new levels of precision, efficiency, and innovation across industrial workflows.

3D Scanning Capabilities

- ▶ Perfect for custom heat exchangers when VSP has zero access to OEM drawings
- ▶ Surfacing software allows us to create primitives directly on top of scan data and export to CAD
- ▶ Ability to analyze scan data to show flange inconsistencies/damage
- ▶ Easily determine gasket dimensions even from closed connections

VSP Technologies deploys a team of Engineers and Fluid Sealing Specialists who provide engineered solutions for your unique sealing requirements.
