# RideTight™

Engineered Fluid Sealing Solutions  
for Bulk Transportation

RideTight is a Six-Sigma approach to Fluid Sealing Management that enhances the safety and reliability of bulk transportation equipment by identifying and analyzing all critical steps of the fluid sealing process to eliminate leaks (NARs).

This approach ensures compliance with industry regulations and FRA safety advisory 2003-1.

Clients work with VSP Sealing Specialists, Field Support Specialists, and Engineers to achieve the lowest Total Cost of Ownership (TCO) for all their fluid sealing needs.

**RideTight®**  
Fluid Sealing  
Management  
Program

**Joining the RideTight Program allows VSP to provide value added services that increase reliability at no additional cost**

RideTight streamlines the fluid sealing process and ensures clients receive:

- ▶ Highest performance sealing products
- ▶ Detailed standard purchasing descriptions
- ▶ Accurate assembly and installation instructions
- ▶ Guidance to achieve the lowest TCO

### Environmental, Social, and Governance (ESG)

VSP Technologies' ESG program – Delivering Value Responsibly (DVR) – is our business and strategy. DVR is built around five focus areas: colleague engagement, health & safety, diversity, equity & inclusion, supply chain, and the environment.
